

- Energy recovery heat pipe heat exchangers
- Wrap-around heat pipe exchangers
- Passive, controllable or pumped solutions

- Water source heat pumps
- Chilled water fan coils and air handlers

- Outdoor patio heating with layout assistance
- Portable gas heaters
- Electric and gas heaters
- Multiple heater controls

- Multifamily HVAC systems
- Chilled water fan coils

- High-capacity duct furnaces
- High-efficiency duct furnaces (93%)
- Highly configurable

- 100% electric DOAS units (heat pump functionality - optional)
- Custom air handling and heat recovery
- Industrial cooling units with integral packaged DX cooling

- Patented PTAC and VTAC technology
- Advanced water source heat pumps

Air curtains
CleanAir™ Series UVC and HEPA filtered
BACnet and wifi capable temperature controls

- Laboratory exhaust fan energy savings control system

- Air-cooled packaged DX DOAS
- Capacity from 3-90 tons
- Compact footprint
- Horizontal supply/return options

- Energy conservation and desiccant dehumidification wheels
- Advanced packaged dehumidification equipment

- Unit heaters (gas, electric, hydronic, steam)
- Gas duct furnaces
- Indirect-fired makeup air units

- REME-HALO uses patented PHI-CELL Technology for air purification
- Ion generators and UV-C lights
- Full residential and commercial IAQ product offering

- Direct-fired makeup air and air handling
- Custom split systems
- Indirect-fired air handling

- Dedicated outside air systems (DOAS)
- Untempered and direct-fired makeup air
- High-efficiency exhaust fans
